Binance Smart Chain (BSC) has been booming with activity. Ranging from token swaps to decentralized money markets and cute NFTs, there are many options to earn yield or simply to have fun. But what do you need to get started, and how do you do it? We'll go through it all in this Whitepaper.

This Whitepaper is intended to provide a brief and general summary of usability of this new digital asset called EAFXFALCON and as any member can public participate and earn like using EAFXFALCON. In this article we will explore how EAFXFALCON will work as an alternative cryptocurrency, in the acquisition of available products and services of the ecosystems associated with EAFXTRADE.COM.

How technical product/digital asset information (software specifications) called EAFXFALCON, and how EAFXFALCON is designed to provide a better experience for cryptocurrency users.

II. INTRODUCTION

What is EAFXFALCON?

EAFXFALCON is the first consumer-oriented cryptocurrency launched in Latin America by Eafxtrade.com, the company that supports the EAFXFALCON token.

The EAFXFALCON Token works just like Bitcoin, but without the mining part. EAFXFALCON aims to virtually eliminate mining for profit.

You can keep the EAFXFALCON token in your wallet and use it to buy products on eafxtrade.com at any time or trade and sell without any kind of blocking. Many will use it as a source of investment, as its amount is limited to 100 million tokens.

With the development of our system, you will be able to:

- Use your EAFXFALCON tokens to make payments for products and services created in our system;
- sell your EAFXFALCON tokens to other colleagues directly from your profile without using intermediaries;

Of course, you can also sell your EAFXFALCON tokens in different cryptocurrency exchanges!

WHAT IS CRYPTOCURRENCY?

Cryptocurrencies are digital systems (protocols) for exchanging value between participants on a decentralised computer network. Bitcoin (BTC) is the most famous and widely-adopted cryptocurrency.

Most cryptocurrencies use hard-to-solve cryptographic puzzles called “Proof of Work” to secure the operation of the network. The process of verifying the cryptographic solutions is commonly referred to as “mining”. Bitcoin introduced a “reward” system, where the miner who solves a block is awarded a small amount of the cryptocurrency. This reward compensates the miner for contributing their hardware and electricity to the mining network.

The solution of a block is a vital operation to allow distributed consensus and add the block to the blockchain.

Technology-rooted movements like Bitcoin have demonstrated, through the power of the default, consensus mechanisms, and voluntary

respect of the social contract, that it is possible to use the internet to make a decentralised value - transfer system, shared across the world and virtually free to use. This system can be said to be a very specialised version of a cryptographically secure, transactionbased state machine.

What is the difference between Cryptocurrency and EAFXFALCON?

Cryptocurrencies like BitCoin are based on technology called mining for distribution of token, where EAFXFALCON is a new type of cryptocurrency (tokens), built on the basis of Ethereum (ERC20) technology and Binance Smart Chain (BEP-20). It offers maximum convenience, maximum security, and involves no bureaucracy. Anyone can review the contract of the currency via a link:

BENEFITS

On traditional server architectures, every application has to set up its own servers that run their own code in isolated silos, making sharing of data hard. If a single app is compromised or goes offline, many users

and other apps are affected. On a blockchain, anyone can set up a node that replicates the necessary data for all nodes to reach an agreement and be compensated by users and app developers. This allows user data to remain private and apps to be decentralised like the Internet was supposed to work.

SECURITY

The EAFXFALCON wallet uses state-of-the-art wallet technology power by Ethereum smart contracts and Binance Smart Chain. Security features are implemented on the very fundamental level possible – inside Ethereum smart contracts. Independent security oracle services are used to authorize transactions inside the network.

IV. ECOSYSTEM AND COMMUNITY

PRODUCTS AND SERVICES

With this EAFXFALCON Project, in addition to being a currency that can be used in any product or service available on the Eafxtrade.com website, we can help you create your cryptocurrency project (ICO)! We are one team of exceptional programmers and visionaries who want to help every idea and together to change the world. We are a community together with each project created in our system. That is, you and us together are one! let's trust hundreds of programmers to be able to meet your expectations of work smoothly.

We are a direct reflection of your success! each of you will receive attention to your project. Many experts will work for you. Don't hesitate to sign up to our website - Tokens are limited, time is limited, but your options are NOT!

Make your project yourself or with friends and join our single system. Tell everyone and your tokens will skyrocket! Our project is a innovation in the cryptographic world as it sets a precedent in collaboration, communication and the development of relationships

between project creators and each customer. The aim of the project is to become a whole!

V. CONCLUSION

So far we have implemented important innovations in EAFXFALCON, but we will not stop there. We have the requirements for a cryptocurrency for a fair economy, and identified important features that will be implemented in the near future.

Please familiarize yourself with the payment terms presented below. Also read our tips on how you can invest wisely. Success!
